## 1 Shipped Product and Version

Open-Xchange Guard backend 1.2.0-rev5

## 2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Release 1.2.0.

### **36280 Problematic PGP keys created**

To prepare PGP support with one of the next releases, the algorithm to create PGP keys has been enhanced. Earlier, keys did not contain a whitespace between user name and mail address. This caused compatibility issues with the popular GPG Tools Suite on MacOSX.

## 3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

## 4 Fixed Bugs

36280,
