2 Bugs fixed since previous Public Release

This section provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #2927.

43228 Infinite sync in case default folders are missing
In order to support a recent enhancement to USM, we've updated OXtender 2 for Microsoft Outlook, which gets delivered via OX Updater. This Patch Release contains middleware packages to provide the most recent version for 7.6.3 deployments.

3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs
