2 Bugs fixed since previous Public Release

This section provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #3188.

44997 Cast error after returning to same node after split
Settings were not accessible, beacuse of PortableSession problem with Hazelcast.
Fixed PortableSession handling to avoid this problem.

43449 Mail ”burger” context menu in H-View not on top of all layers
Mail ”burger” context menu was partially hidden by the upper layer if the screensize is small.
This has been fixed by displaying the menu always on top.

44551 Recipients separated by , or
can not be ”batch”-added to distribution list anymore;It was not possible to add several recipients to a distribution list by , or ; seperated list.
This has been solved by adding handling for those lists.

44854 Share Service not started, no new folders can be created
Hard dependency on ShareService lead to not some problems.
Solution: Do not hard-require ShareService, but acquire it on demand.

3 Tests

Not all defects that got resolved could be reproduced within the OX QA lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

44997, 43449, 44551, 44854,
