2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #4993.

61726 Properties in Tasks-Burger-Menu is missing

Properties menu was disabled for tasks and extension points where not working with tasks. This has been solved by reenabling properties menu and adjusted extension points to support tasks again.

61756 Calendar: Sunday day name in year view not in red color

Index overflow (day 8 instead of 1) led to a non-red marked Sunday. Now using correct modulo to display the Sunday in red.

61799 Sending email to participants with only second email not possible

It was not possible to send an email to an appointment participant if he had only a secondary email address entered inside the address book. This has been fixed by using provided data instead of fetching everything.

3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

61726, 61756, 61799,
