2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #5106.

62605 Contact Print Action 'details' option is displaying City and Postal code in the same line

Print used own format of address where it was not possible to internationalize the address. This has been fixed by using internationalization approach which is already used to display the address in the contacts detail pane.

63240 Cannot open newsletters with new google chrome 72

Links opened by blankshield are blocked due to security reasons. Solution: Open links with rel="noopener" directly in chrome 72 and above. Note that this is just an intermediate fix and will be replaced as soon as the issue is fixed in blankshield.

3 Changes relevant for Developers

3.1 Changes of internal APIs

Change #SCR-401 Accept new "no_nested_message" parameter for /mail?action=get endpoint

Accept new boolean "no_nested_message" parameter for /mail?action=get end-point. If set to "true" nested messages are handled as regular attachments.

4 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

5 Fixed Bugs

62605, 63240,
