2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #4670.

65073 Java JVM Crash on spell check with emoji Emojis U+1F60A

There is an issue in the hunspell library which cannot cope with composed utf-16 characters. As we use the library in-process the SIGSEGV causes a complete crash of the process.

This has been fixed by filtering out all composed utf-16 characters to prevent possible crashes in the hunspell library.

3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

65073,
