

Release Notes for Patch Release #5437
2019-10-16

Security Patch Release

This Patch Release addresses critical vulnerabilities; please consider deploying it as soon as possible. Not deploying this Patch Release may result in remote service exploitation, security threats to users and exposure of sensitive data.

Detailed vulnerability descriptions will be publicly disclosed no earlier than fifteen (15) working days after public availability of this Patch Release. There is no indication that one or more of these vulnerabilities are already getting exploited or that information about them is publicly circulating.

2 Vulnerabilities fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #5418. Solutions for vulnerabilities have been provided for the existing code-base via Patch Releases.

66594 CVE-2019-16717

CVSS: 2.2

67097 CVE-2019-16717

CVSS: 3.1

66538 CVE-2019-16716

CVSS: 2.2

3 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #5418.

66241 Attach as PDF to e-mail after making changes does not use the changed PDF

Same request parameters lead to same responses from the MW #getDocument Ajax handler. In case the request parameters don't change after revisionless save, the response will be the unchanged one.

This has been fixed by providing 'revtag' parameter when creating the attachment.

67006 Renaming folder with initial asterisk results in lost folder

Was caused by wrong detection whether a move or a rename needs to be performed.

Fixed check whether a move or a rename needs to be performed to solve this issue.

4 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

5 Fixed Bugs

66241, 67006, 66594, 67097, 66538,
