2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #5437.

66610 Resizing of images and text is not working when IE is used

Table layout does not work correctly in IE11 switch to block when IE11 is detected. This has been fixed by adjusting class=body section in mail detail view for IE11.

67091 Not displaying all recipients when sending email with multiple recipients(>5) in "TO" and "CC"

This was caused by missing CSS. This has been fixed by adding missing css ellipsis.

67196 Email body for appointment invites is not auto fitting in compact view across all browsers

This has been fixed by adding some overflow styles inside the css file.

67650 Not able to add image to signature

This was caused by DOMPurify removes src="blob:..." This has been solved by using data uri instead.

3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

66610, 67091, 67196, 67650,
