2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #5621.

68397 Tasks are reset iPhone

A NPE was triggered if start_time is not set(null).
This has been fixed by using correct variable to determine UTC time difference.

OXUIB-136 Calendar Print View was missing a detail

Missing appointment list in day printing view.
This has been fixed by adding list again (also includes location).

OXUIB-64 Can not remove root (system) folder from Favorites in Mail

Wrong module guessed from system folder (system does not have favorites).
This has been solved by using module information from the actual folder view instead of the module information from the folder model. Only fall back to old behaviour if no information is available.
This way it should always be possible to remove folders from the folder view directly.

MWB-130 File gets deleted when uploading new version and having autodelete_file_versions=true retentionDays=1 and maxVersions=1

Wrong version number for current version was assumed when auto-deleting file versions.
This has been solved by passing proper current version number to auto-delete routine.

MWB-103 Recurring tasks can not be marked as done via EM Client

The caldav servlet doesn't support operations on recurring tasks, but it also doesn't filter recurring tasks out.
This has been resolved by just filtering those recurring tasks.

3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

68397, OXUIB-136, OXUIB-64, MWB-130, MWB-103,
