

**Release Notes for Patch Release #5780**  
2020-06-30

**Security Patch Release**

This Patch Release addresses critical vulnerabilities; please consider deploying it as soon as possible. Not deploying this Patch Release may result in remote service exploitation, security threats to users and exposure of sensitive data.

Detailed vulnerability descriptions will be publicly disclosed no earlier than fifteen (15) working days after public availability of this Patch Release. There is no indication that one or more of these vulnerabilities are already getting exploited or that information about them is publicly circulating.

## 2 Vulnerabilities fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #5764. Solutions for vulnerabilities have been provided for the existing code-base via Patch Releases.

**MWB-265 CVE-2020-15004**  
CVSS:3.1

**MWB-289 CVE-2020-15003**  
CVSS:3.1

**MWB-348 CVE-2020-15002**  
CVSS:3.1

**OXUIB-308 CVE-2020-15004**  
CVSS:3.1

**DOCS-2147 CVE-2020-15002**  
CVSS:3.1

**DOCS-2148 CVE-2020-15002**  
CVSS:3.1

**DOCS-2368 CVE-2020-15004**  
CVSS:3.1

**DOCS-2437 CVE-2020-15004**  
CVSS:3.1

## 3 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #5764.

### **68091 Found no such composition space**

Existing mechanism to periodically perform a clean-up task for expired composition spaces might not trigger actual clean-up often enough.

This has been solved by choosing another mechanism to periodically perform a clean-up task for expired composition spaces.

### **MWB-359 External accounts can not be changed anymore**

A mail account is not necessary linked to linked to a transport account. Thus no transport server information can be obtained.

This has been solved by checking if mail account is linked to a transport account when testing if

transport server settings are about to be updated.

**OXUIB-53 Error dialog calendar account not translated**

In case of several broken calendars, the error of the second calendar will be overwritten by the error of the first one.

It was ensured that the correct error is always displayed.

**OXUIB-302 URL scrambled in Resource, when it contains numerical string**

Regex to detect phone numbers was not strict enough.

This has been fixed by reworking regex to detect phone numbers better.

## 4 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

## 5 Fixed Bugs

68091, MWB-359, OXUIB-53, OXUIB-302, MWB-265, MWB-289, MWB-348, OXUIB-308, DOCS-2147, DOCS-2148, DOCS-2368, DOCS-2437,
