2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #5924.

MWB-105 Update copyright year to 2021

Copyright notice in as-config-defaults.yml file was not aligned to current year.
This has been solved by changing copyright notice in as-config-defaults.yml file.

MWB-793 MySQL deadlock on delete user

Built-in retry mechanism does not work in case a MySQL deadlock error occurs, which suggests to restart transaction.
This has been solved by orderly passing SQLException as cause to wrapping StorageException to let built-in retry mechanism kick-in.

OXUIB-541 Login page cut off on small screens

The header and footer were absolute positioned, which doesn't look nice with a flex layout.
This has been fixed by refactoring markup to use flex layout as it is intended.

OXUIB-584 Theme is translated as Design in pane.js

Theme has been translated with Design and Design has also been translated with Design.
This has been solved by changing the translation of Theme from Design to Theme.

OXUIB-627 Appointments jump to current week on click

The short drag started the drag and drop mechanism of the appointment. Usually, this will not be a problem, but if the appointment is not within the displayed timeframe, the drag and drop mechanism does not work.
This has been solved by disabling drag and drop for appointments, that are not within the visible timeframe.

3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

MWB-105, MWB-793, OXUIB-541, OXUIB-584, OXUIB-627,
