2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 7.10.5.

OXUIB-677   Mail folder not visible after creation
Event listerners were still listening on an old collection.
This has been fixed by adjusting event listeners after folder rename.

OXUIB-661   Popup / popout mail view nearly impossible from list-view
Single and double clicks on the same element were competing and leaded to inconsistent behavior.
This has been fixed by treating double clicks as single clicks on list elements in list layouts.

OXUIB-609   "Remove photo" button greyed out after image resolution is too high
Buttons were not enabled after dialog gets idle.
This has been solved by setting dialog to idle also when cropped image can't be loaded.

OXUIB-536   Signatures not above quoted text on forwarded mail
Was caused by forwardUnquoted not recognized by plaintext editor.
This has been solved by adding forwardUnquoted detection for plaintext editor.

OXUIB-514   Attachments deleted from draft return after saving draft
Draft was saved before all delete requests were processed.
This has been solved by waiting for all delete requests to be resolved, also if draft gets deleted.

MWB-930   Appointment invitation: .ics file gets saved as .dat file in drive
Different generation of fallback attachment filename extension.
This has been solved by using the common method to yield fall-back name with a reasonable file extension.

MWB-928   CompositionSpaceCleanUpTask seems to trigger UpdateTasks on all schemas after 7.10.4 upgrade automatically
Unexpected trigger of update task for a schema that is currently checked for possible expired composition spaces.
Skip clean-up of expired composition spaces for those schemas that are currently updated or need an update to solve this.

MWB-924   Wrong encoding in plain-text sharing-mail-body using umlauts in display name
Sender's full name for introduction in drive mail notifications escaped twice.
This has been fixed by escaping sender's full name for introduction in drive mail notifications only once.

MWB-919   Not possible to add Yahoo address books
The callback URL was not constructed properly.
This has been fixed by constructing the callback URL properly.

MWB-910   "restricted" session parameter not distributed in session storage
Restricted scopes session parameter were incompatible with portable serialization.

This has been solved by using comma-separated string for restricted scopes session parameter.

MWB-903   One user can create stack traces to JE >36.000 lines
Equal exceptions chained multiple times.
This has been solved by avoiding chaining equal exceptions multiple times.

MWB-891   An error occurred: HTTP/1.1 423 Locked
Possible concurrent modification of storage objects is quitted with "HTTP/1.1 423 Locked" status response leading to abortion of request processing.
This has been fixed by introducing retry mechanism with exponential back-off in case Sproxyd service quits request with "HTTP/1.1 423 Locked".

MWB-868   Dataexport fails with "No such file or directory" error message
Intermediate clean-up task unexpectedly dropped file storage resources.
This has been solved by not running clean-up task when there are currently running data export tasks.

3   Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.
To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4   Fixed Bugs
