2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #6020.

OXUIB-941 Help files for FR-Canada switches to English

This has been solved by adding specific mapping for fr_CA when loading help.

OXUIB-906 Dav sync option shown in address book settings, without dav installed

Was caused by a missing check for capabilities carddav / caldav.

This has been fixed by hiding toggle buttons when carddav or caldav is missing.

OXUIB-940 UI window formatting glitch after opening connect your device

CSS selector for steps was too generic.

This has been fixed by using id selectors for wizard steps.

MWB-1023 Connect your device SMTP Settings

SMTP host & login information advertised as "None" in case SMTP authentication is disabled through configuration.

Several changes were applied: Do not advertise SMTP host information as "None" in case SMTP authentication is disabled through configuration. Set SMTP user name in configuration regardless if SMTP authentication is enabled or not. Fallback to IMAP login in case SMTP login is provisioned to be an empty string.

3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

OXUIB-941, OXUIB-906, OXUIB-940, MWB-1023,
