2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #6034.

OXUIB-1013 Sharing tasks only possible with "View" permissions

Rights changed to viewer for guestes without notice.
Now give a notice to user when rights are changed.

MWB-1247 Subscribed mail account saves drafts to primary account

Final draft messages are not stored in appropriate account's standard drafts folder.

Final draft messages are now orderly stored in appropriate account's standard drafts folder. Please note that storing intermediate draft messages associated with an alive/intact composition space are intentionally stored in primary account's standard folder.

See also: https://documentation.open-xchange.com/7.10.5/middleware/mail/mail_compose/01_drafts.html#mail-storage-utilization

MWB-1244 Report client not finishing

`com.openexchange.report.appsuite.storage.ContextLoader.getAllContextIdsInSameSchema(int, Connection)` returns an empty abstract list if a schema has no results for contexts (see table `context_server2db_pool`).

This has been solved by returning `new ArrayList<>` instead of `Collections.emptyList()`.

3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs
