2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #6060.

OXUIB-1061 Composer loading slow/hangs with a lot of recipients

The calculation has been corrected and irrelevant scrollbars are hidden to solve this issue.

OXUIB-963 2fa not working with form/token login anymore

Rampup extensions trying to fetch data without session requiring multifactor. Replaced missing rampup call.

Solution: exit the rampup stage early if multifactor is required after login. Add back missing rampup call.

MWB-1346 Service com.openexchange.contact.storage.ContactStorage is temporary not available

Missing access when looking up enhanced entity information as guest user.

This has been solved by adjusting handling when looking up enhanced entity information.

MWB-1343 Premature end of Content-Length delimited message body error on Image Preview

Possible premature end of stream when reading a Scality object's content.

Solution: Gracefully deal with possible premature end of stream when reading a Scality object's content.

3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

OXUIB-1061, OXUIB-963, MWB-1346, MWB-1343,
