2 Breaking Changes

Warning

This delivery is affected by changes which potentially require manual interactions at update time. Please read this section carefully before updating and follow the guidance. We highly recommend to prepare the update on a staging or test system in advance.

ASP-119;Add Greek language support;With this patch we will introduce Greek language support.

3 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #6176.

OXUIB-1653 Broken Free-Busy calendar

Was caused by incomplete (but still valid) freebusy data.

This has been solved by making the planning view more robust, using the data that is there and using defaults for the rest.

MWB-1819 Address is set to the own address when replying to an eMail

Failed parsing of RFC 822 E-Mail addresses having "mailto:" prefix in address part.

Solution: Orderly parse RFC 822 E-Mail addresses having "mailto:" prefix in address part.

OXUIB-1807 Deduplication of email address when adding a contact to a distribution list does not work (sometimes)

Check was only done in contact picker.

This has been solved by making a proper check when members are added to the list.

MWB-1808 Notification popup for tasks in appointments does not come up for all accounts in context

Reminders which are not accessible anymore are usually deleted. This didn't work in this case because a slightly different exception was thrown.

This has been fixed by extending the check to encompass more error codes.

MWB-1801 Dataexport limits file size silently to 4GB

Files/items that require Zip64 support abort creation of resulting data export ZIP archive.

This has been solved by introducing new config option "com.openexchange.gdpr.dataexport.useZip64" whether ZIP64 format should be used which supports files larger than 4GB (default is true).

MWB-1782 Unexpected error using User Copy Tool: Duplicate entry

This only includes the partial fix for the potential null pointer that occurred for a user.

MWB-1779 JPEG cannot be added - error: Upload file is invalid or illegal

False-positive detection of a JavaScript event handler.

Fixed false-positive detection of a JavaScript event handler to solve this issue.

MWB-1826 Image not displayed in a signature

Added DEBUG logging.

4 Changes relevant for Operators

4.1 Changes of Configuration Files

Change #SCR-1141 Added option to specify whether ZIP64 format is supposed to be used for data export

Added lean config option "com.openexchange.gdpr.dataexport.useZip64" to specify whether ZIP64 format is supposed to be used for generated data export ZIP archives. ZIP64 does support files larger than 4GB and has a few more less restrictions than ZIP32 format.

Neither reloadable nor config-cascade aware.

5 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

6 Fixed Bugs

OXUIB-1653, MWB-1819, OXUIB-1807, MWB-1808, MWB-1801, MWB-1782, MWB-1779, MWB-1826,
