## 2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #6215.

### **MWB-1989 Customer not able to delete appointment series**

Malformed organizer value in change exception leads to problems when deleting appointment series along with overridden instances.

Solution: Don't let delete operation fail upon malformed change exception data while tracking changes.

### **MWB-2028 TNEF (winmail.dat) Attachments not viewable and downloadable anymore**

TNEF attachments cannot be downloaded/viewed.

Fixed look-up of attachments in case IMAP message has TNEF content.

### **MWB-2025 User in error message not found by lookup**

Error while loading nonexistent user for DEBUG logging.

Fixed avoidable exception on DEBUG logging.

### **DOCS-4632 LOADDOCUMENT\_CANNOT\_RETRIEVE\_OPERATIONS\_ERROR on opening document**

The document provided does not follow the specification of the OOXML file format.

The docx filter is now more fault tolerant with the w:cryptAlgorithmSid attribute of the settings.xml.

### **MWB-2027 Illegal format: SQL Problem: "%1\$s" code: OX-0013**

Missing error message argument on SQL error.

This has been solved by specifying missing error message argument on SQL error.

### **MWB-2026 Dataexport failed with "Unexpected error: null" for mail**

Connection loss errors during mail export operation.

This has been solved by trying to recover from possible connection loss errors during mail export operation.

### **MWB-2010 Download personal data ZIP file is invalid on MacOS Archive Utility**

ArchiveUtility seems to have problems with certain compression levels.

This has been solved by using the default compression level for generating GDPR exports.

### **OXUIB-2164 Irregular sorting display within Drive folders**

Folders in 'Public files' folder tree were sorted by date of creation.

Now sort alphabetically by folder name.

### **OXUIB-2148 Printing a short mail always creates two pages in print preview**

Chrome behaves differently when using 'display: flex'.

This has been solved by removing 'pull-left' from element since this eliminates the issue.

### **OXUIB-2109 Display error when focusing mail color flag in Chrome**

Too narrow for default focus style.

This has been solved by adding some padding.

**MWB-2001 Drivemail expired files not being deleted**

Folder meta information not correctly set.

This has been solved by only changing meta information for a folder if set.

**MWB-1511 Shared and public Task folders have wrong dav data**

used\_for\_sync was not evaluated properly.

Properly set and evaluate "used for sync" for task folders to solve this issue.

### 3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

### 4 Fixed Bugs

MWB-1989, MWB-2028, MWB-2025, DOCS-4632, MWB-2027, MWB-2026, MWB-2010, OXUIB-2164, OXUIB-2148, OXUIB-2109, MWB-2001, MWB-1511,
