## 2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #6239.

### **MWB-2189 OX-DB Statements are not closed**

Database statements were not closed on user deletion.  
Orderly closing database statements have fixed this on user deletion.

### **MWB-2182 Several occurrences of "Unexpected runtime excpetion" and similar typos in Code**

Solved by fixing the typo in log message.

### **DOCS-4771 Keyboard not working on mobile Chrome**

Modified Chrome behavior. After opening the software keyboard, a change in Chrome triggers immediate close of the software keyboard.  
This has been solved by adding a timeout, so that event for immediate closing of the software keyboard is not handled.

## 3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

## 4 Fixed Bugs

MWB-2189, MWB-2182, DOCS-4771,
