

Release Notes for Patch Release #6243 2023-08-01

Security Patch Release

This Patch Release addresses critical vulnerabilities; please consider deploying it as soon as possible. Not deploying this Patch Release may result in remote service exploitation, security threats to users and exposure of sensitive data.

Detailed vulnerability descriptions will be publicly disclosed no earlier than fifteen (15) working days after public availability of this Patch Release. There is no indication that one or more of these vulnerabilities are already getting exploited or that information about them is publicly circulating.

3 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #6241.

MWB-1764 Account status could not be determined

Invalid check against blocked hosts/allowed ports when obtaining status for subscribed mail ac-

counts.

This has been fixed by not checking against blocked hosts/allowed ports when obtaining status for subscribed mail accounts.

MWB-2201 Secondary mail account folders not translated

Standard folders of secondary accounts were not translated.

Now translate standard folders of secondary accounts as well.

OXUIB-2444 Wrong chat Documentation in 7.10.6

Outdated help Version which accidentally contains the Chat topic.

This has been fixed by installing the fixed Help version.

4 Changes relevant for Operators

4.1 Changes of Configuration Files

Change #SCR-1218 New config option for sanitizing CSV cell content on contact export

New lean config option "com.openexchange.export.csv.sanitize" for sanitizing CSV cell content on contact export. Default is false. Reloadable, but not config-cascade aware.

5 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.
