3 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #6256.

MWB-2342   Sieve scripts for mail categories not created
The login source wasn't correctly identified in case session-full-login was used.
This has been fixed by properly identifying session-full-login as the login source.

MWB-2354   Shared folder not visible when sharing users have identical display name
Shared folders from different owners with the same display name lead to conflict.
This has been solved by orderly dealing with shared folders from different owners with the same display name.

4 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.
    To avoid side effects, the shipped packages have gone through automated regression test on

both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.
