USM was using the content-transfer-encoding from x-original-headers if this header is missing in the upsynced headers by the client. Since for text parts the client doesn't set the content-transfer-encoding header, USM will default to "quoted-printable" instead of using the possible existing value in x-original-headers now.

5. Tests

The OX QA team has verified all bug fixes.

To avoid side effects the packages have gone through automated smoke and regression test on both, the OX Build System and a distributed OX QA server setup.

In addition all bug fixes have been checked for potential side effects or changed behavior. Unless explicitly stated with one of the bug entries above, we do not expect other side effects.
