

Release Notes

Public Patch Release 1264 (2012-12-27)

1. Origin Product/Version

Open-Xchange App Suite 7.0.0-rev3

2. Packages shipped with this Patch Release

Open-Xchange App Suite 7.0.0-rev4

3. Bugs fixed with this Patch Release

24333 Unable to get calendar data using CalDAV

Caused by some optimization efforts, an interface regarding DAV folder names did break. This led to defunct synchronization of CalDAV clients like Apple Calendar. The issue has been fixed by revoking the optimization. It may be required for users to reset their CalDAV based synchronization in order to get it working again.

Changes of Configuration Files

- none -

Changes of Database Schemes

- none -

Changes of Command Line Tools

- none -

Changes of Behavior

- none -

Changes of Packaging

- none -

- none -

Changes of the RMI API

- none -

Changes of the SOAP API

- none -

Changes of the WebDAV API

- none -

Changes of the GUI-API

- none -

5. Tests

The OX QA team has verified all bug fixes.

To avoid side effects the packages have gone through automated smoke and regression test on both, the OX Build System and a distributed OX QA server setup.

In addition all bug fixes have been checked for potential side effects or changed behavior. Unless explicitly stated with one of the bug entries above, we do not expect other side effects.

6. Fixed bugs
