2 Bugs fixed with this Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 1.2.0-rev6. Some of the announced bug fixes may have already been fixed at the existing code-base via Patch Releases.

DMF-132   NPE if phase-field is missing
Status: Done
Resolution: Fixed
Components: Scheduler
Affected Packages: open-xchange-dmf-scheduler

DMF-143   Underscore cannot be used in Source name due to config lookup
Status: Fixed
Root Cause Description:

> char '_' in the source based config normalizes to '-' in the source name.

Solution Description:

> don't allow '_' in source names.

Severity: 4
Components: Worker
Affected Packages: open-xchange-dmf-scheduler

DMF-144   Delete Sourcehost does not delete associated target ids
Status: Fixed
Root Cause Description:

> Target uids are stored in a separate table with no enforced relation with the user tables due to the user table sharding structure. Deleting the sourcehost skipped clearing the associated target uids.

Solution Description:

> Delete the target uids for the associated users of a sourcehost.

Severity: 3
Components: Scheduler
Affected Packages: open-xchange-dmf-scheduler

DMF-145   Archiver liquibase updates not executed when database is not named "migration"
Status: Fixed
Root Cause Description:

> Database name 'migration' was hard coded in some liquibase updates.

Solution Description:

> Don't specify the database name.

Severity: 3
Components: Scheduler
Affected Packages: open-xchange-dmf-scheduler

DMF-146   Journal archiver commit fails for large journal
Status: Fixed
Root Cause Description:

archiver does not have a limit

Solution Description:

added a limit to the archiver

Severity: 3
Components: Scheduler
Affected Packages: open-xchange-dmf-scheduler

3   Changes relevant for Operators

3.1   Changes of Behavior

Change #DMF-115   Log to JSON
Status: Done
Resolution: Fixed
Components: Scheduler, Worker
Labels: logging
Affected Packages: open-xchange-dmf-scheduler

4   Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

5   Fixed Bugs

DMF-132, DMF-143, DMF-144, DMF-145, DMF-146,
