1. Shipped Products and Versions

OX Dovecot Pro v2.2.36.2

Including Object Storage and Full Text Search Plug-ins

Supported OS Distributions:

- [CentOS](#) 6.99, 7.6
- [Debian](#) jessie (8.11), stretch (9.7)
- [RHEL](#) 6.5, 7.0
- [Ubuntu](#) 14.04 LTS, 16.04 LTS

2. Release Highlights

- Fix obox regression: metacache was not uploading index changes to storage (broken in v2.2.36.1)

3. Detailed Changes

3.1. Object Storage (obox) Plug-in

- **ISSUE DOV-2960:** metacache master process wasn't triggering index bundle uploads on background. This meant that it could have taken a very long time between index bundle uploads, causing user moves between backends to be expensive and losing message flags since the last index bundle upload. [Regression in v2.2.36.1 and v2.3.3]

4. Tests

The Dovecot QA team has successfully verified all issue fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.
