# 1. Shipped Products and Versions

OX Dovecot Pro v2.2.36.8

Including Object Storage (obox) and Full Text Search (FTS) Plug-ins

Supported OS Distributions:

- CentOS 6.9, 7.8
- Debian wheezy (7.11), jessie (8.11), stretch (9.12)
- RHEL 6.5, 7.0
- Ubuntu 14.04 LTS, 16.04 LTS

## 2. Release Highlights

This release fixes a critical issue with the CVE fix shipped in v2.2.36.7.

This release replaces v2.2.36.7; that version should not be used in production.

### Summary of Highlights

- Fix: v2.2.36.7 MIME CVE fix (CVE-2020-12100) caused certain messages to be parsed incorrectly, potentially preventing a user from viewing body content (depending on the client)

## 3. Detailed Changes

### 3.1. Dovecot Pro Core

- **ISSUE/SECURITY DOV-4033:** v2.2.36.7 regression: MIME parts not returned correctly by Dovecot MIME parser. Dovecot handles trailing dashes in boundaries incorrectly. This regression was introduced when fixing the MIME CVE-2020-12100 issue.

### 3.2. Object Storage (obox) Plug-in

No Changes

### 3.3. Full Text Search (fts) Plug-in

No Changes

### 3.4. Pigeonhole (sieve) Plug-in

No Changes

### **3.5. OX Engage (imap-injection) Plug-in**

No Changes

### **3.6. Chat Over Imap (coi) Plug-in [beta]**

No Changes

### **3.7. Intercept (intercept) Plug-in**

No Changes

## **4. Tests**

The QA team has successfully verified all issue fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

## **5. Repository Information**

For details of how to install and update OX Dovecot Pro, please refer to the instructions at:
