# 1. Shipped Products and Versions

OX Dovecot Pro v2.3.12.1

Built on Dovecot Community Edition Core v2.3.12

Including Object Storage (obox) and Full Text Search (FTS) Plug-ins

Supported OS Distributions:

- [Amazon Linux 2](#)
- [CentOS 6.9, 7.8, 8.2](#)
- [RHEL 6.9, 7.4, 8.2](#)
- [Debian stretch \(9.13\), buster \(10\)](#)
- [Ubuntu 16.04 LTS \(xenial\), 18.04 LTS \(bionic\)](#)

Apache Cassandra Driver: [v2.13](#)

## 2. Release Highlights

### Summary of Highlights

- Various bugfixes related to (obox) metacache cleaning.

## 3. Upgrade Information

None

## 4. Known Issues

- Not all Dovecot 2.2.x logging has been converted to Dovecot 2.3.x events, so newer logging/metrics configuration will not work on these older log entries.

## 5. Detailed Changes

### 5.1. OX Dovecot Pro Core

- **ISSUE DOV-4196:** Event filter syntax error may lead to Panic: file event-filter.c: line 137 (event\_filter\_parse): assertion failed: (state.output == NULL).
- **ISSUE DOV-4204:** v2.3.11 regression: Searching messages that have no terminating MIME boundary assert-crashes (unless FTS is used): Panic: file message-parser.c: line 174 (message\_part\_finish): assertion failed: (ctx->nested\_parts\_count > 0).
- **ISSUE DOV-4217:** doveadm-server could crash if logging was done outside command handling. For example http-client could have done debug logging afterwards, resulting in either segfault or Panic: file http-client.c: line 642 (http\_client\_context\_close): assertion failed: (cctx->clients\_list == NULL).

## 5.2. Object Storage (obox) Plug-in

- **ISSUE DOV-4144:** Various bugfixes related to metacache cleaning: The users' cleanup priorities were not always calculated correctly, resulting in non-optimal cleaning behavior. The cleaning could have gotten stuck in some rare situations. Cleaning speed now depends on how close to full `metacache_max_grace` usage is.
- **ISSUE DOV-4208:** Opening a new autocreated folder may have caused it to become cleaned while it was being opened in some rare situations. This resulted in an immediate rebuild, logging: "Warning: Mailbox INBOX: Rebuilt missing new mailbox index in ...".
- **ISSUE DOV-4219:** "doveadm obox user delete" fails if other sessions are still open: Panic: file metacache-index.c: line 1043 (metacache\_index\_open): assertion failed: ((flags & METACACHE\_INDEX\_OPEN\_FLAG\_FORCE\_RESCAN) == 0 || \*rescan\_needed\_r || open\_res < 0).
  - "doveadm obox user delete" now fails with exit code 65 in these situations.
- **ISSUE DOV-4222:** Accessing stale metacache may have crashed: Panic: file metacache-get.c: line 2316 (metacache\_bundle\_commit): assertion failed: (!guid\_128\_is\_empty(request->mailbox\_guid)).

## 5.3. Full Text Search (fts) Plug-in

No Changes

## 5.4. Pigeonhole (sieve) Plug-in

No Changes

## 5.5. Intercept (intercept) Plug-in

No Changes

## 6. Tests

The QA team has successfully verified all issue fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

## 7. Repository Information

For details of how to install and update OX Dovecot Pro, please refer to the instructions at:

[https://doc.dovecot.org/installation\\_guide/dovecot\\_pro\\_releases/repository\\_guide/](https://doc.dovecot.org/installation_guide/dovecot_pro_releases/repository_guide/).
