1 General Information

- **Debian Bookworm support**

In accordance with the supported platform policy and to ensure a stable and up to date environment, Open-Xchange supports Debian Bookworm (Debian 12) for OX App Suite v7.10.6, starting with this patch. We encourage administrators to update to the latest operating system version. For details of all supported platforms and databases please refer to the requirements page at: https://oxpedia.org/wiki/index.php?title=AppSuite:OX_System_Requirements

- **OX Mobile API Facade removal**

As previously announced, in July 2024, Open-Xchange discontinued support for the OX Mobile API Facade. With this patch the OX Mobile API Facade is completely removed from the software stack.

3 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #6292.

MWB-2645 ERROR USR-0010 Cannot find user with identifier 3 in context

Misleading error message when autologin is tried with residual session for deleted user. Silently fail autologin if user from residual session was deleted in the meantime.

MWB-2684 FLD-0038 while trying to upload some audio files

SQL primary key error potentially raised when reserving folder name
Improved reserved folder name.

4 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

5 Fixed Bugs

MWB-2645, MWB-2684,
