2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 2.10.0.

59403 Guests are unable to reply to encrypted mail

In case just the `guard-mail` capability was assigned to guest users as `staticGuestCapabilities` or when setting `com.openexchange.share.guestCapabilityMode` to `inherit`, guest users had trouble replying to encrypted mail. Certain OX Guard specific message headers were missing in this case. We adjusted the frontend part to make sure these headers are supplied for those capability scenarios.

3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.
To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

59403,
