## 2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 2.10.4.

### **GUARD-215 "View this version" link doesn't decrypt Guard file**

This was caused by extension name changes and changes in version behaviour.

This has been fixed by creating the "View this version" guard menu extension that is limited to version dropdown in file viewer.

## 3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.
