2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #5907.

DOCS-3218 Edit shared encrypted file as external guest with permission Reviewer

Guard was unable to find the key for a Guest user, since the guest userid/cid was not associated with keys.

Solution: Guests re-encrypting files will be based upon the shares, ignoring the guest user account. Guests should not be able to create new encrypted files.

GUARD-267 Quotation mark in guard password leads to "Bad password" error when trying to download the keys

Password was not properly encoded before being added to the form submitted for downloading private keys.

This has been fixed by encoding password properly.

3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs
