2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #5953.

GUARD-268   Parameter MAX_UPLOAD_SIZE in infostore.properties is ignored when trying to encrypt large files
MAX_UPLOAD_SIZE from infostore.properties was ignored when encrypting files and just the value from server.properties was checked.
This has been solved by using MAX_UPLOAD_SIZE from infostore.properties before falling back to the value from server.properties.

3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.
To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs
