## 2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #5954.

### **GUARD-268 Parameter MAX\_UPLOAD\_SIZE in infostore.properties is ignored when trying to encrypt large files**

MAX\_UPLOAD\_SIZE from infostore.properties was ignored when encrypting files and just the value from server.properties was checked.

This has been solved by using MAX\_UPLOAD\_SIZE from infostore.properties before falling back to the value from server.properties.

## 3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

## 4 Fixed Bugs

GUARD-268,
