2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #5984.

GUARD-286 Error sending encrypted mail: GRD-OX-API-0003

Sending to alias email of the senders account causes error. Guard doesn't realize alias and creates Guest account, but MW won't allow creating a share link of alias.

This has been fixed by searching for aliases of sender.

3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

GUARD-286,
