## 2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 2.10.5.

### **GUARD-314 Guard server error when trying to bulk decrypt files**

Temporary file cleanup was associated with the server request. During bulk encrypt/decrypt, the UI consolidated several of the file requests under the same server call (using the multiple call). As a result, a race condition occurred, where file cleanup was initiated before all of the sub-requests finished.

This has been solved by removing the temporary file cleanup associated with requests.

## 3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

## 4 Fixed Bugs

GUARD-314,
