2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #6076.

GUARD-327 Guard init throws NCD FE

Caused by a library upgrade in core, the classpath of the command line tool was wrong and a `NoClassDefFoundError` was thrown.

This patch is only a rebuild against the latest backend revision, no code change needed.

3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

GUARD-327,
