## 2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #6221.

### **GUARD-416 User can get an error when replying to Guard email (The action is not supported: 'OTHER')**

The content type of the email will be reloaded during a refresh from the decrypted content type (say text/html) back to multipart/encrypted. Guard treats it as an encrypted email even though the email has already been decrypted. As the email is decrypted, no encryption type is recognized. This has been solved by improving the detection of crypto type.

## 3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

## 4 Fixed Bugs

GUARD-416,
