Open-Xchange Guard 2.10.7-rev10

Find more information about product versions and releases at `http://oxpedia.org/wiki/index.php?title=AppSuite:Versioning_and_Numbering` and `http://documentation.open-xchange.com/`.

2   Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #6258.

GUARD-447   Forwarded mails not displayed correctly
Expected security info missing in forwarded emails.
This has been solved by adding additional check for security info before checking values.

GUARD-463   Data truncation: Data too long for column (smime_pub)
Insufficient table size for chain.
This has been fixed by increasing Smime public certificate table column size. See SCR-1334.

3   Changes relevant for Operators

3.1   Changes of Database Schema

Change #SCR-1334   Increase column size for public certificate and chain
Column for chain increased from varchar 8192 to 11000
Column for public key increased from 4096 to 5000

4   Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.
     To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

5   Fixed Bugs
