3 Bugs fixed with this Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Release 1.0.0. Some of the announced bugfixes may have already been fixed at the existing code-base via Patch Releases.

35650 Database setup fails

In case a custom name for "configdb" has been used, initial database setup for Guard fails. This has been solved by properly handling this condition at the REST API communication.

4 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

5 Fixed Bugs

35650,
