2 Bugs fixed since previous Public Release

This section provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #2777.

41837 Can't decrypt mail in tab

Guard was not able to decode email in full screen mode.

Fix manifest for calling Guard UI when full screen email displayed to allow decoding emails in full screen mode.

41553 Public-Key-Server-request of the Appsuite stalls, because of a missing timeout

Connecting to a keyserver with firewall protected port lags because of a missing timeout.

This has been fixed by adding a timeout.

41919 Guard does not support http proxy

This was fixed by adding java startup -D flag support for proxy configuration.

3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

41837, 41553, 41919,
