open-xchange-messenger 1.0.0-rev13

open-xchange-appsuite-messenger 1.0.0-rev13

open-xchange-appsuite-messenger-static 1.0.0-rev13

2 General information

OX Messenger is a real time text, voice and video communication application that fully integrates into OX App Suite. OX Messenger can connect to existing third-party telephony options such as VoIP, PBX, PSTN termination etc.

The solution is based on latest web-standards such as WebRTC, HTML 5 and Websockets. This provides a single responsive user interface that automatically optimizes itself for desktops. OX Messenger also works with industry standard protocols such as SSL, XMPP, SIP and RTP and enhances OX App Suite core applications with advanced real-time communication capabilities.

OX Messenger is built to provide maximum performance, resilience and horizontal scalability. OX Messenger uses a new JAIN SLEE based XMPP Server that provides ultimate performance. The OX Messenger Gateway creates the communication between parties, but when possible it hands off the communication to a peer-to-peer protocol. This maximizes performance, reduces latency and increases both quality and privacy.

Features and benefits of OX Messenger:

- Integrated into OX App Suite
- Text, Voice and Video Chat/Calling: One to One or Group
- WebRTC support (With Flash based fallback for non WebRTC compliant browsers)
- Phone dialing: Landline, mobile etc.
- Chat and call history
- Guest mode for communication with non OX AppSuite users

A more detailed overview of the main functions and features to OX Messenger can be found at http://software.open-xchange.com/products/messenger/doc/Feature_Overview_OXMessenger_1_0_0.pdf

A more detailed overview about the current limitations to OX Messenger can be found at http://oxpedia.org/wiki/index.php?title=AppSuite:OX_Messenger#Known_Limitations

Pricing and Availability

In order to evaluate OX Messenger integration please contact OX Sales. OX Sales will process the request and provide pricing and license keys.

In order to reduce complexity and speed up deployment OX Messenger will also be made available via OX as a Service, the fully hosted version of OX App Suite. Please contact Open-Xchange Sales for further information and pricing details. You need valid API KEY/SERVER informations, which will only be provided by the OX Sales and/or Professional Services team. OX Messenger will not work without this data/information."

For details of how to install OX Messenger please refer to the instructions given at: http://oxpedia.org/wiki/index.php?title=AppSuite:OX_Messenger
