2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #2457.

38624 Group calling doesn't work

Due to a change in Chrome and Firefox, the current implementation of Group Calling doesn't work anymore. This issue is fixed for latest Chrome, but due to a bug in Firefox, group-calling for now only works in Chrome. See filed bug @ Firefox: https://bugzilla.mozilla.org/show_bug.cgi?id=1173348

3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs
