1 General Information

Open-Xchange is pleased to announce the release of OX Mail App v2. OX Mail App v2 is the next generation of our native mobile phone app.

In a mobile first world, with a growing number of devices per user, service providers are under increasing pressure to offer customers email services across a wide range of devices. The OX Mail App v2, for iOS and Android, provides fast and robust email access on both smartphones and tablets. It is designed to work seamlessly with OX App Suite.

OX Mail App v2 is a native mobile app built specifically for smartphone and tablet users who already have a valid OX App Suite account. OX Mail App v2 is an entirely new generation of email app when compared with the current OX Mail App v1. This app lets users access their OX App Suite email environment directly from a native mobile client. It provides the following:

- Available for iOS and Android on both mobile and tablet devices.
- Quick and easy onboarding.
- Incoming emails are displayed instantly (subject to the appropriate configuration of the server).
- Preview messages with the help of teaser texts.
- User-friendly, due to native design, with state of the art gestures.
- Offline capable - answer and manage previously read emails offline. Everything is synchronized once you are online again.
- Privacy features such as certificate pinning (Android only), securely stored credentials, securely stored email bodies, securely stored attachments and integration with Dovecot Anti-Abuse Shield.

What's New in General and Feature Overview

Open-Xchange now provides more detailed overviews and Feature Overview documents relating to new product releases. These can be found at <https://www.open-xchange.com/portfolio/whats-new/>

Requirements

To use OX Mail App v2 you need to be running OX App Suite v7.8.4, or above, together with the new Mobile API Facade. The Facade module provides an API optimized for mobile use-cases.

OX App Suite v7.8.4

OX App Suite is an advanced platform designed for telcos, hosters, and other service providers to deliver a wide range of cloud-based services. These include email, file sharing, collaborative document editing, document management, time management, cloud storage and metrics for insight into end-user behavior. Further information can be found at <https://www.open-xchange.com/portfolio/whats-new/>.

Mobile API Facade

The Mobile API Facade is a server component that optimally connects the new mail app with OX App Suite. Fa?ade is based on existing technology that is already in use and proven in the OX App Suite middleware. The Facade is developed in Java, utilizing the OSGI-Framework. Further information can be found at: https://oxpedia.org/wiki/index.php?title=AppSuite:Mobile_API_Facade.

For further details about download & install, branding, push setup & configuration, please refer to the documentation provided: http://oxpedia.org/wiki/index.php?title=AppSuite:OX_Mail_v2_0.
