2 Bugs fixed with this Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 1.0.27. Some of the announced bug fixes may have already been fixed at the existing code-base via Patch Releases.

OMFACADE-680 Mobile API Facade does not start after Middleware update

The Mobile API Facade needed a rebuild after the latest Middleware release, which included library updates. These broke the Mobile API Facade as it still referenced the old versions of the libraries.

3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

OMFACADE-680,
