2 Bugs fixed with this Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 2.1.0-rev15. Some of the announced bug fixes may have already been fixed at the existing code-base via Patch Releases.

OMF-746   Not all errors are listed in "window context failures"
Status: Done
Root Cause Description:

uncaught exceptions do not have a "success" key in their details.

Solution Description:

include "exception" objects in the failure output.

Resolution: Verification not Possible
Severity: 3
Source Directory: cli

OMF-748   Orchestrator: window batch list doesn't return correct context IDs
Status: Done
Root Cause Description:

The list of context IDs that are correctly send as part of the Scheduler's response were pre-formatted into compressed ranges, and the order of those was erroneous.

Solution Description:

Fixed how the pre-formatted compressed ranges are calculated.

Resolution: Verification not Possible
Severity: 3
Components: Orchestrator
Source Directory: cli

3 Changes relevant for Operators

3.1 Changes of Behavior

Change #OMF-744   Add Ability for Workers to skip Windows
Status: Done
Resolution: Done
Components: Orchestrator, Scheduler, Worker General
Affected Packages: open-xchange-omf-scheduler

Change #OMF-752   Scheduler REST API instead of Kafka for Batches
Status: Done
Resolution: Done
Components: Scheduler, Worker General
Affected Packages: open-xchange-omf-scheduler

4   Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

5   Fixed Bugs
