# 2   Bugs fixed with this Release

This section provides a summary of bug fixes and changes that have been applied  subsequently to shipping Release 2.1.0-rev19. Some of the announced bug fixes may have already been fixed at the existing code-base via Patch Releases.

**OMF-826**   **Window create with –presync switch doesn't execute presync phase**
Issue can be reproduced
Status: Fixed
Root Cause Description:

> A bug in the method that copies the attributes of the {{NewWindow}} (which is the REST data that the Orchestrator sends to the Scheduler) to the {{WindowEntity}} (which is the object that is persisted into the Scheduler database in the {{window}} table), erroneously using the value of {{preprov}} to set the {{presync}} attribute.

Solution Description:

> Use the {{presync}} flag in the {{NewWindow}} to set the {{presync}} flag in the {{WindowEntity}}

Severity: 1
Components: Orchestrator, Scheduler
Affected Packages: open-xchange-omf-scheduler

# 3   Tests

Not all defects that got resolved could be reproduced within the lab.  Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

   To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing.  All changes have been checked for potential side-effects and effect on behavior.  Unless explicitly stated within this document, we do not expect any side-effects.

# 4   Fixed Bugs
