2   Bugs fixed with this Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 2.1.0-rev25. Some of the announced bug fixes may have already been fixed at the existing code-base via Patch Releases.

OMF-706   Guard Migration requires target contexts to be in the same schema
Status: Fixed
Root Cause Description:

> Updating the {{mKeyIndex}} in {{og_KeyTable}} on target was restricted on the same database schema which cannot be guaranteed.

Solution Description:

> Don't restrict contexts to be in the same schema but run through all contexts and their schemas.

Severity: 3
Components: Worker General
Affected Packages: open-xchange-omf-target-guard

OMF-709   Database Export and Import ignore errors which can lead to data loss
Status: Fixed
Root Cause Description:

> The database export json object and stream is closed when there is an exception. The exception is propagated to the web service, but the web service cannot change the http status or write the exception in the json body. This results in a 200 response with valid looking json body with no indication of failure.

Solution Description:

> When an exception occurs, write an error object and only properly complete the json stream if the error can be written.

Severity: 2
Components: Source, Worker Database
Affected Packages: open-xchange-omf-target
open-xchange-omf-worker

3   Changes relevant for Operators

3.1   Changes of Behavior

Change #OMF-711   BlackWhiteList failures should provide better detail
Status: Done
Resolution: Done
Components: Source, Worker Cloud-Plugins
Affected Packages: open-xchange-omf-worker

Change #OMF-712   Implement workaround for oauthAccounts table bug
Status: Done
Resolution: Done
Components: Worker Database
Affected Packages: open-xchange-omf-target
open-xchange-omf-worker

4   Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

5   Fixed Bugs

OMF-706, OMF-709,
