2   Bugs fixed with this Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 2.1.0-rev30. Some of the announced bug fixes may have already been fixed at the existing code-base via Patch Releases.

OMF-750   Problem in updateUserQuotas in target premigration
Status: Fixed
Root Cause Description:

The detection whether a dedicated user filestore exists was incomplete.

Solution Description:

Fixed the user filestore detection.

Severity: 3
Components: Target
Affected Packages: open-xchange-omf-target

3   Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.
    To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4   Fixed Bugs
