2   Bugs fixed with this Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 2.1.0. Some of the announced bug fixes may have already been fixed at the existing code-base via Patch Releases.

OMF-612   Bump open-xchange-omf-worker Cloud-Plugins dependency to > = 1.11.6-rev1
Fix package dependency information for open-xchange-cloudplugins, requiring at least version 1.11.6 due to the use of the Class of Service API which was introduced in 1.11.6-rev1.
Status: Fixed
Root Cause Description:

> The dependency on open-xchange-cloudplugins is currently set to >= 1.11.3, but the implementation uses API methods that have been introduced in 1.11.6-rev1.

Solution Description:

> The package dependency on open-xchange-cloudplugins was changed to >= 1.11.6

Severity: 3
Components: Worker General
Affected Packages: open-xchange-omf-worker

OMF-627   IllegalFormatConversionException during user quota update
Fixes an exception when a call to set the max file quota during preprovisioning fails.
Status: Fixed
Root Cause Description:

> Passing an Optional<Long> to a %d formatter in a String.format

Solution Description:

> use Optional<Long>.or(0L)

Severity: 3
Components: Target
Affected Packages: open-xchange-omf-target

3   Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.
To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4   Fixed Bugs
